Gatekeeper setting when first launching TEAC HR Audio Player (for Mac OS)

If the Gatekeeper setting (General tab of the Security & Privacy pane in the System Preferences) is anything other than "Allow applications downloaded from anywhere," the following warning message will appear.

In this case, click "OK" to close the warning message.

Control-click (right-click) the file and choose "Open" from the menu. When the following warning message appears, click the "Open" button.

Changing the Gatekeeper setting

You can change the Gatekeeper setting by setting "Allow applications downloaded from:" to "Anywhere" on the General tab of the Security & Privacy pane in the System Preferences. In order to change this setting, you must click the gear icon at the bottom left and input an administrator name and password to unlock the settings.

If you click the 🧶 button or type command-Q, for example, to quit System Preferences, the settings will lock again.

Caution

Changing the Gatekeeper setting could increase the risk to computer security. After changing the Gatekeeper setting in a way that reduces security (choosing an item lower in the list), restore the setting to its original value after launching the file. The following warning message will appear If you set "Allow applications downloaded from:" to "Anywhere". Click the "Allow From Anywhere" button.

	Choosing "Anywhere" makes your Mac less secure.	-
A logir	Instead, you can allow an individual application from an unknown developer by control-clicking its icon and selecting Open.
